Vision Statement

For casual TV viewers **who** want an easy way to review shows and episodes and possibly discuss and share their thoughts with others, t**he** TVrater is a web-based service **that** allows users to easily share their opinions on TV shows they have been watching as well as comment and interact with others on the site. **Unlike** letterBoxd, **our product** focuses on TV shows instead of movies and has a more simplistic approach which makes the site easy to use for all.
